

Item 54-B  
Supervisor Antonovich

Earlier this year, the Board moved the Environmental and Toxicology lab from the Department of Agricultural Commissioner/ Weights and Measures to the Department of Public Health. Since that time the Department of Public Health has investigated options for providing an appropriate facilities to accommodate a lab for environmental toxicology, veterinary public health and environmental health.

I, therefore, move that the Board of Supervisors direct the Interim CEO and the Interim Director of Public Health to report back on the costs and feasibility of establishing one location for these consolidated lab services
